

Recent works in Marlborough have resulted in heavy congestion to the road network and the street works team have been both pro-active and reactive in directing and co-ordinating the works to mitigate as best as possible the disruption this has caused.

The worst periods of congestion were as a result of a combination of factors that we either had no knowledge of (our own unnoticed works), immediate urgent works, or where site conditions changed which effected the traffic management required to undertake the works. The most recent incident being works on Salisbury Road where the contractor working on behalf of the statutory undertaker- Gas Transportation Company (GTC) who took the unauthorised decision to hold all temporary signals on red for approx 30 minutes. The contractor is currently investigating this and GTC will be taken to task once we have the report from the contractor. GTC works on Salisbury road are now complete.

Reporting just on the main roads in and out of Marlborough there are numerous planned works over the coming weeks that we are co-ordinating to mitigate as much as possible the affect the works will have on the network.
