

MARLBOROUGH FLOOD DASHBOARD DROP-IN

Marlborough Town Council have supported Action for the River Kennet (ARK) in the development of an online Flood Dashboard which brings together information from the river, groundwater and rainfall level gauging stations that impact on the risk of floods for Marlborough in one easy to find place

The data will be presented as an online dashboard, with only the levels relating to Marlborough displayed. The information is intended to help residents of Marlborough and Manton, and those supporting them to have a better understanding of flood risk. The website is accessible to anyone with internet access

We are hosting a **drop-in session** at the **Town Hall** on **Thursday 3rd April** from **6.30pm – 7.30pm** to give everyone with an interest an opportunity to find out more about the **Dashboard** and learn how to use and understand the **information on it**

For more information, please contact *Clare Williams - Marlborough Town Council*
